

Elite Toolkit

SilverHawk Elite Indicators — PRO

Any Strategy → Filter → Confirm → Execute

Standalone tools for stronger confirmations.

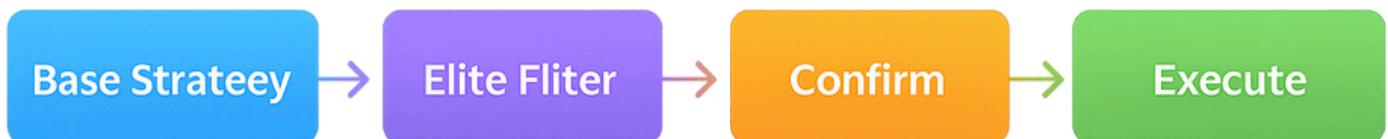

v1.0

Important: Read This First

This is an add-on toolkit. Not a signal generator.

- Use one of SilverHawk strategy provides the entry idea.
- Elite tools grade the setup (regime / alignment / scenario / flip quality).
- Use them as filters to avoid low-quality trades.
- Best results come from rejecting trades, not forcing trades.

If the toolkit says Low Quality / Misaligned / High Risk → no trade.

Elite Toolkit – Module Map

SilverHawk Elite Indicators — PRO

Pick any module as an add-on. No fixed sequence.

Decision Dashboard

Filters trades by regime + risk + quality

Use when: Before any entry to decide trade vs skip

HTF Alignment Score

Scores if your setup aligns with HTF bias

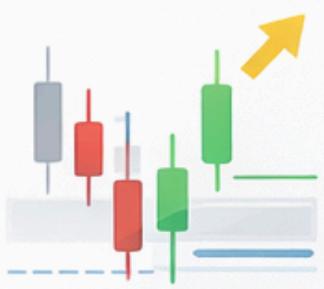

Use when: Before entry to avoid counter-trend trades

Scenario Projection

Maps likely paths + key levels ahead.

Use when: To plan targets and invalidation cleanly

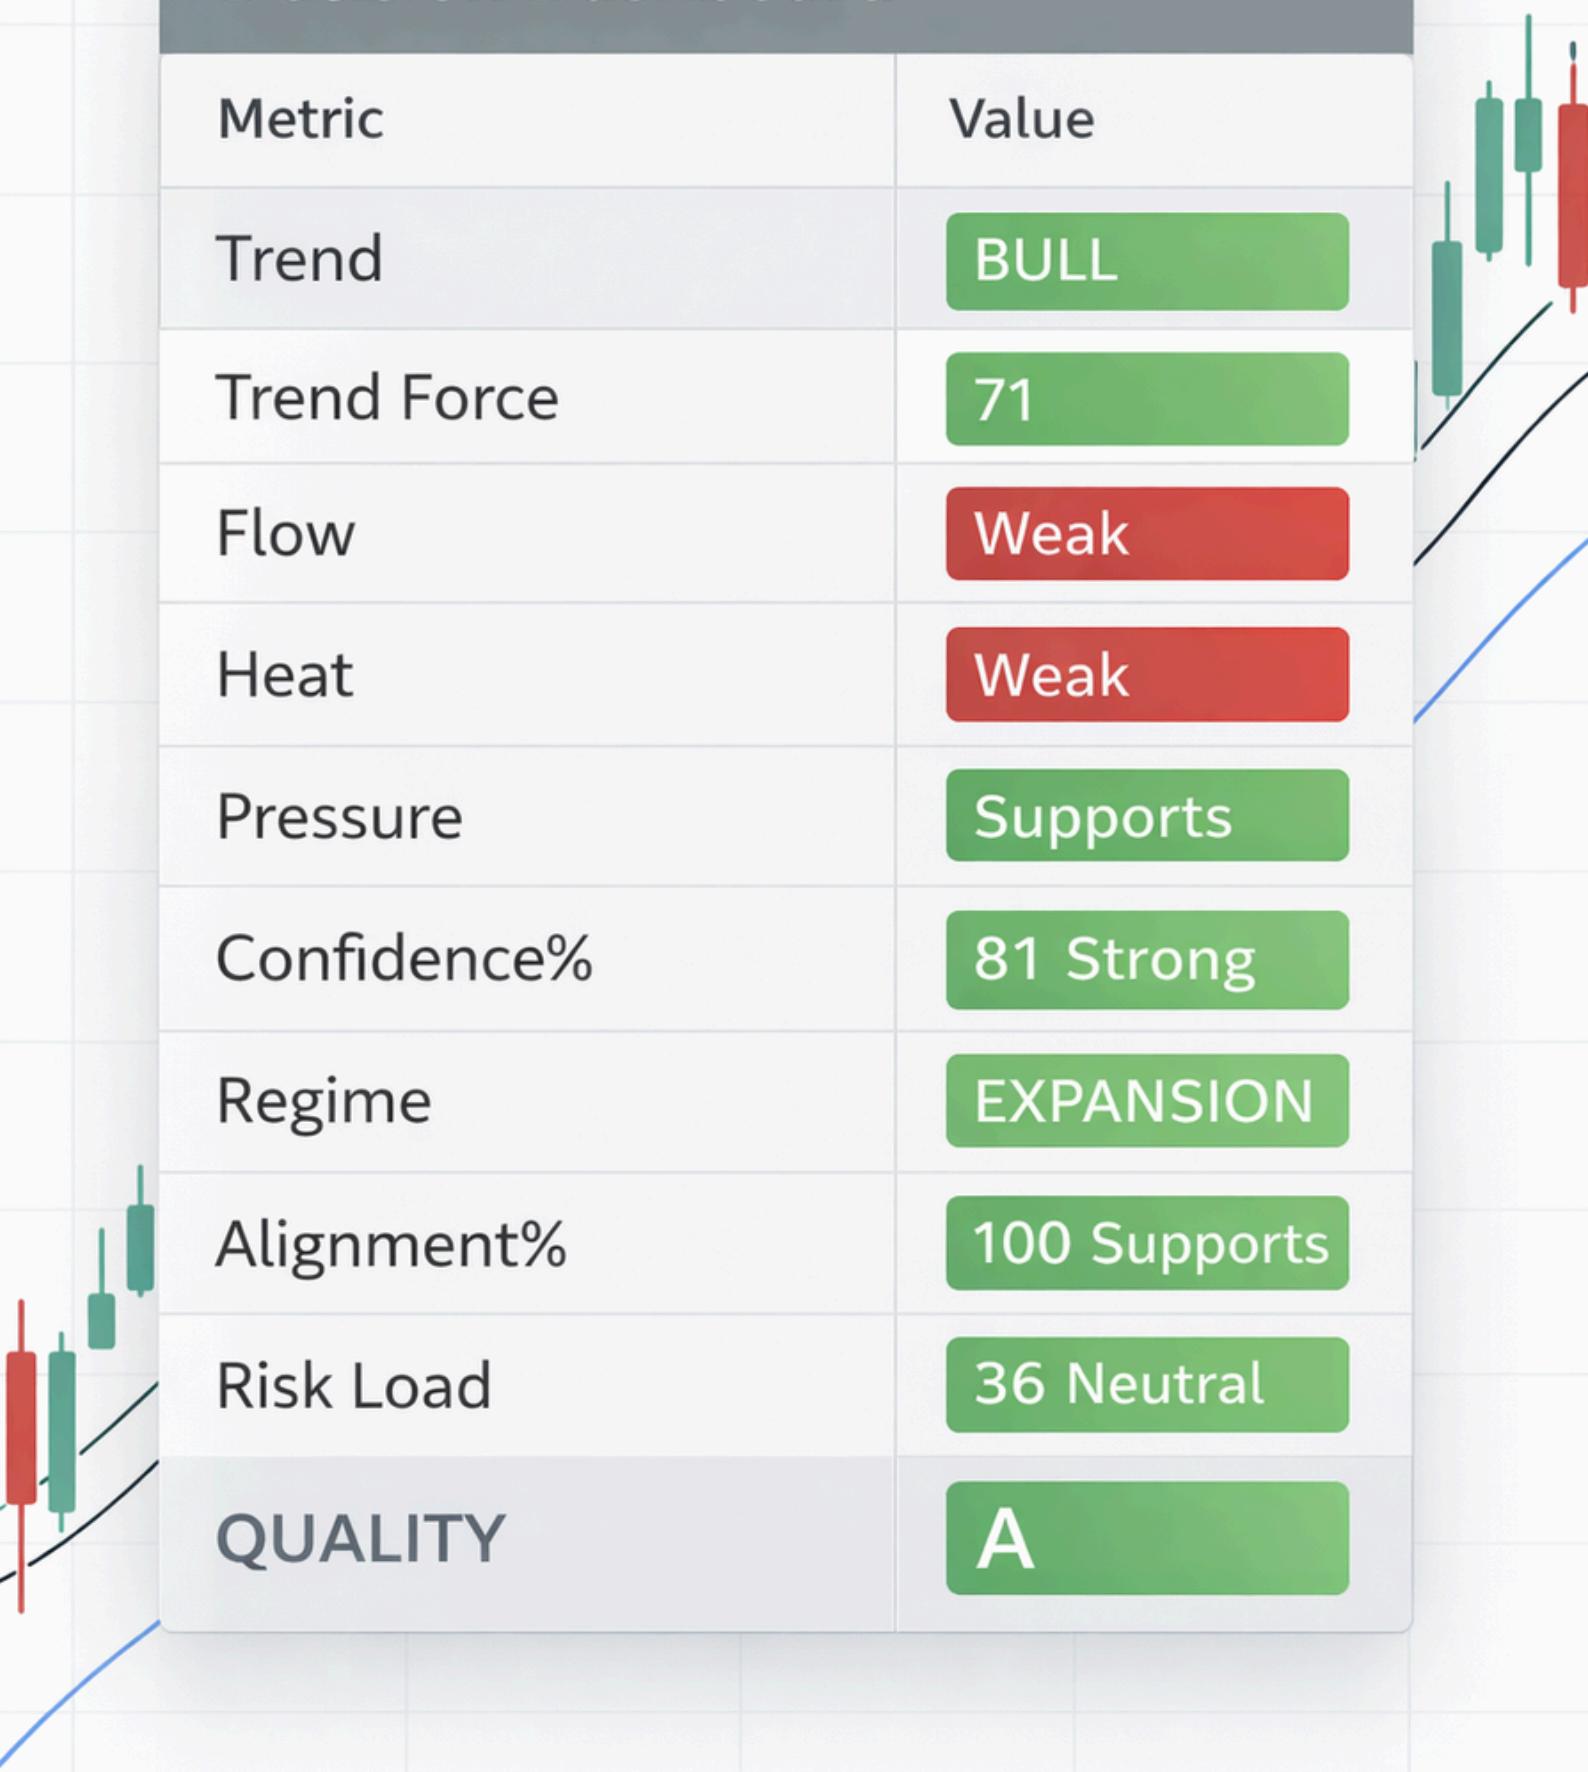

HQ Flip Confirm

Confirms only high-quality trend flips

Use when: When a flip/reversal signal appears

Decision Dashboard

Metric	Value
Trend	BULL
Trend Force	71
Flow	Weak
Heat	Weak
Pressure	Supports
Confidence%	81 Strong
Regime	EXPANSION
Alignment%	100 Supports
Risk Load	36 Neutral
QUALITY	A

Example: How to Read the Decision Panel

Decision Dashboard	
Metric	Value
Trend	BULL
Trend Force	73
Flow	Neutral
Heat	Weak
Pressure	Supports
Confidence%	79 Strong
Regime	EXPANSION
Alignment%	100 Supports
QUALITY	A

Decision Dashboard	
Metric	Value
Trend	BEAR
Trend Force	39
Flow	Weak
Heat	Weak
Pressure	Weak
Confidence%	32 Weak
Regime	COMPRESSION
Alignment%	34 Weak
QUALITY	C

GOOD trade

Allowed (if your **strategy trigger** exists)

A + Low Risk = you're allowed to execute your trigger

BAD trade

Skip (even if your **strategy trigger** exists)

C or Compression = no trade, regardless of trigger

HTF Alignment

- Aligns lower timeframe to two higher timeframes
- Raises confidence % and setup grade
- Avoid if misaligned or near HTF level

HTF Alignment	
Metric	Value
Trend (LTF)	BULL
HTF1 (4H)	BULL
HTF2 (D)	BULL
Confidence%	77 Strong
Alignment%	100 Supports
Proximity	FAR (13%)
QUALITY	A

Simplified Rules

- ✓ Pass gate (agree 2+ votes + 67% aligned)
- ✓ GRADE rises further when Alignment% > 80%
- ✓ GRADE capped to B if between 50–80%
- ✓ GRADE auto-wait for align < 50% or NEAR)

Example – HTF Alignment

HTF Alignment	
Metric	Value
Trend (LTF)	BULL
HTF1 (4H)	BULL
HTF2 (D)	BULL
Alignment%	100 Supports
Proximity	FAR (13%)
Gate	PASS
QUALITY	A

What it means

- All votes BULL = Continue downtrend
- Aligned 100% = Grade jumps to A
- We're 13% away from HTF level

SH Scenario Matrix Pro

Scenario Projection Planning

- ✓ Forecasts high probability paths
- ✓ Aligns all tools into one clear view

SH Scenario Matrix Pro

Example in Action

Price breaks out above HTF resistance as 3 analog markets forecast bullish continuation

Dashboard

TREND	BULLS
HTF (THE.)	BULLS
GreefiBEARISH	BULLS
TEAM	G/BULLS
GREEN/BEARISH	GreeriLE
QUALITY	A

Key Points

- Trend = **POS**
- HTF = **POS**
- 3 Correleted Markets = 3x Likely Continuation
- Expert labels confirmation from PO to P10 > MID

SH Flip Confirm Pro

4-Step Zone Reversal Strategy

• What it does

- ✓ Predicts shifts in key levels ahead
- ✓ Uses four confirmations to end price sweeps

4 Steps

1

1. Sweep

Price below S&D zone

2. Displacement

Strong candle up

3. BOS

Breaks swing high

4. Retest

Retests OB & holds

1 Steps

1

Sweep

Price below S&D zone

2

Displacement

Strong candle up

3

BOS

Breaks swing high

4

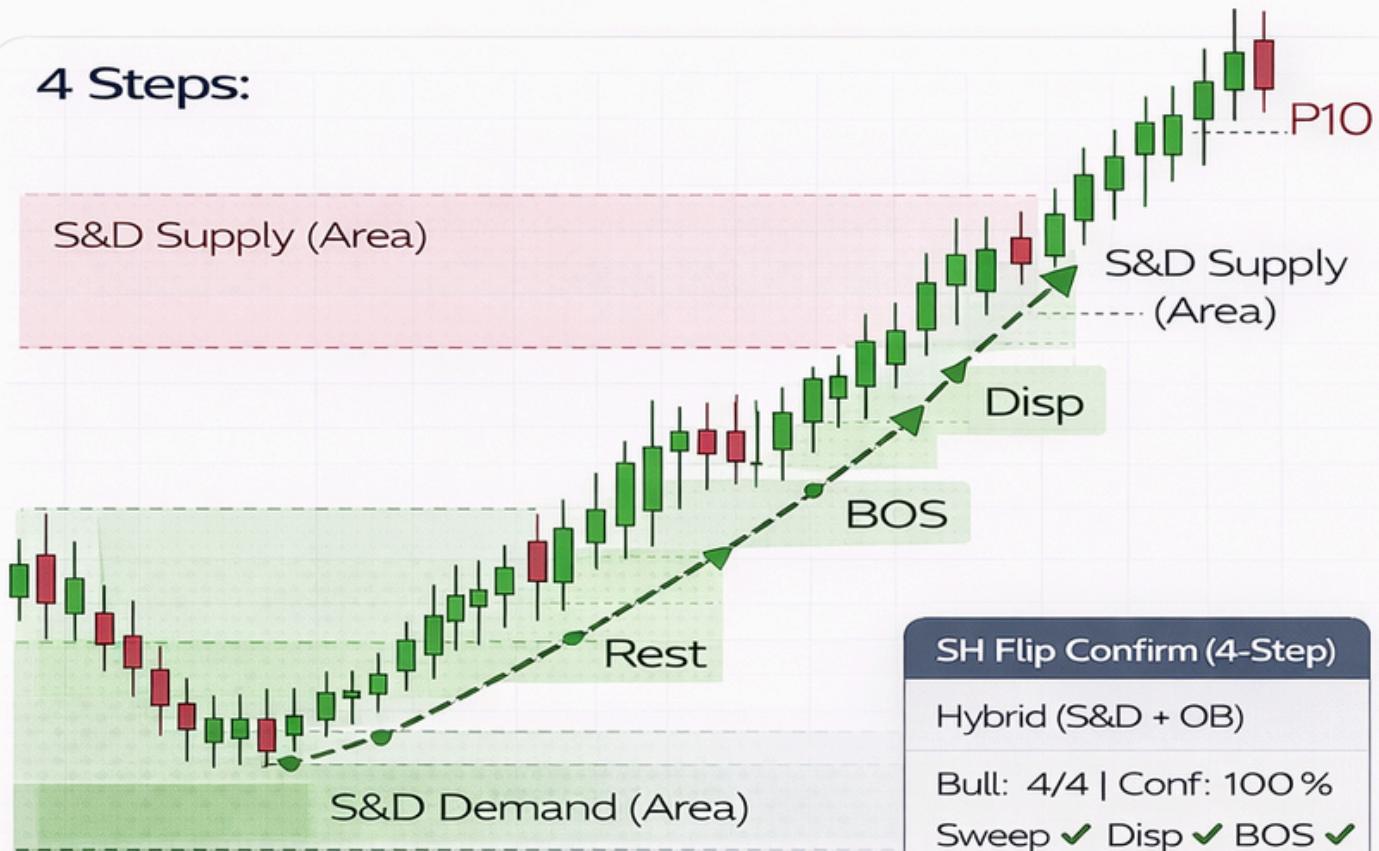

Retest

Retests OB & holds

SH Flip Confirm Pro

Example: Bullish Flip

4 Steps:

SH Flip Confirm (4-Step)

Hybrid (S&D + OB)

Bull: 4/4 | Conf: 100 %

Sweep ✓ Disp ✓ BOS ✓

Bear: 0/4 | Conf: 0 %

Perfect: Sweep – Disp – BOS – Retest

1

1. Sweep ✓

Price sweeps below S&D zone

2. Displacement

Strong candle up

3. BOS

Breaks swing high

4. Retest

Retests OB & holds

Valid Entry Rule:

1

All 4 steps confirmed.

Retest inside S&D.

X

No retest inside S&D.

Rule = No hold / chase

Valid Entry Rule

All 4 steps confirmed.
Retest inside S&D.

1 Sweep

Sweep below S&D zone

2 Displacement

Strong candle up

Valid Entry

All 4 steps
confirmed.
Retest inside

No-Trade

No retest inside
S&D. Rule =
No hold / chase

Elite Usage Rules

(Read This Once)

1. Elite tools do NOT give entries — your strategy gives the entry.
2. Never override Trend + HTF Alignment — if they disagree, skip.
3. Only take "A" quality setups when market is messy; "B" is optional; avoid "C/WAIT".
4. Scenario Matrix is planning, not a signal — trade only when it matches your setup direction.
5. Flip Confirm is the final gate — no flip = no entry (even if everything else looks good).
6. One trade idea = one bias — don't switch sides mid-trade because a tool changed.

If the confirmations don't align → no trade.

Before You Trade This Live

- Practice in replay mode first
- Save screenshots of 20 trades (wins + losses)
- Track what checklist item failed on losing trades
